RESPONSE TO AMENDMENT

1. Applicant's amendment filed is acknowledged. Claims 27 and 30-52 are pending and under examination in this application. Upon further consideration, the finality of the previous office action is withdrawn. It is noted that a Notice of Appeal and Appeal Brief have been filed. Applicant can request a refund for the associated fees or leave it as credit for future appeals. The text of those sections of Title 35, U.S. Code, not included in this action can be found in a prior office action.

Claim Rejections Withdrawn

2. The rejection of claims 27 and 30-33 under 35 U.S.C. 112, first paragraph, as lacking enablement commensurate in scope with the claims is withdrawn in response to Applicant's amendment.
3. The rejection of claims 27 and 30-33 under 35 U.S.C. 103(a) is withdrawn in response to Applicant's amendment.

New Grounds of Rejection

4. Claims 27, 30-33, and 51 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

These claims are drawn to methods of treatment involving interleukins. Unlike the interferons, interleukins are a structurally and functionally diverse family. Not all of the members of this family are anti-inflammatory; as was discussed previously, interleukin-1 is pro-

inflammatory. Similarly, interleukin-18, which is also known as interferon γ inducing factor, would be expected to have pro-inflammatory effects. Applicant has provided no characteristics by which one of skill in the art could identify anti-inflammatory interleukins. While the art identifies several, it also fails to describe any characteristics that would identify a genus of such molecules. Thus anti-inflammatory interleukins are not described so that one of skill in the art would comprehend that Applicant was in possession of the genus, and of methods of using the genus.

Allowable Subject Matter

5. Claim 52 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

CLAIMS 27, 30-33, AND 51 ARE REJECTED. CLAIM 52 IS OBJECTED TO.
CLAIMS 34-50 ARE ALLOWED.
